wrong.

Hi CLICKY

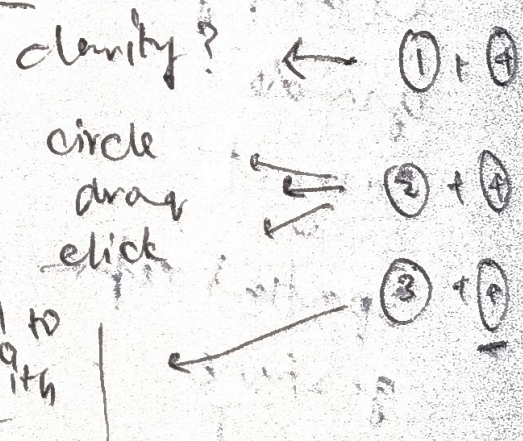

user state action

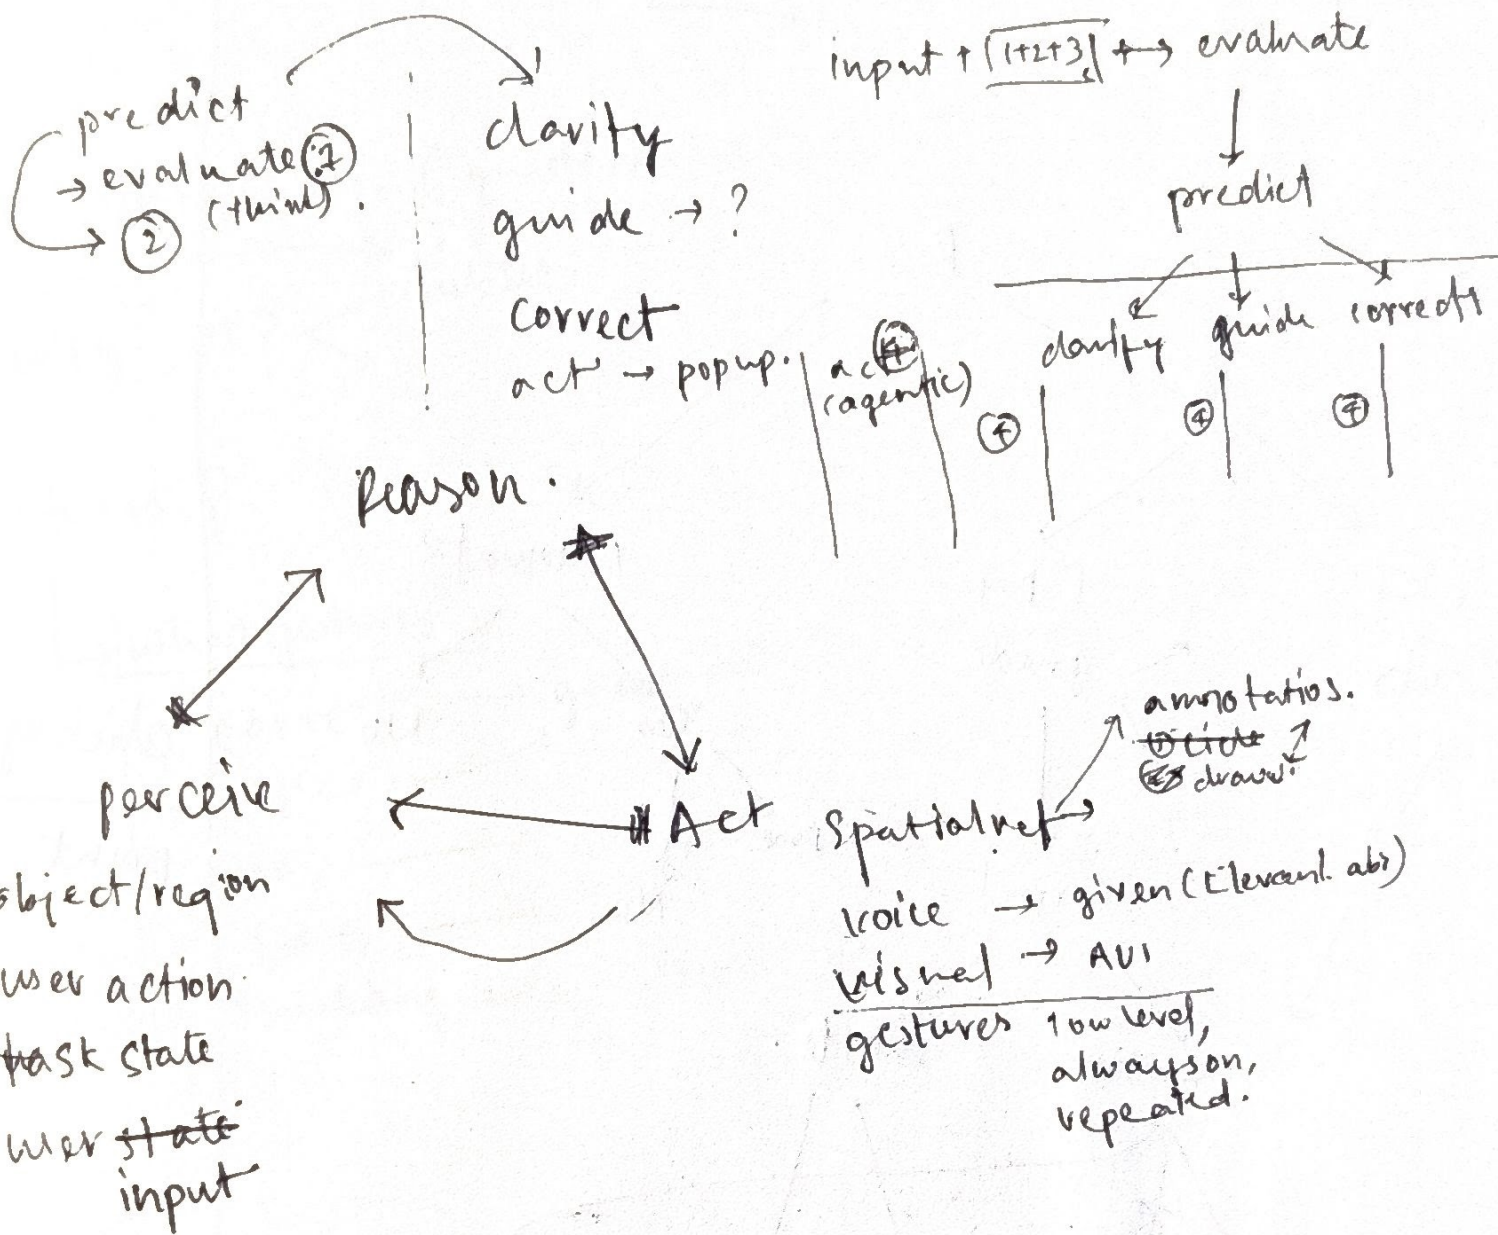

voice
[face]

plan the task

user action state

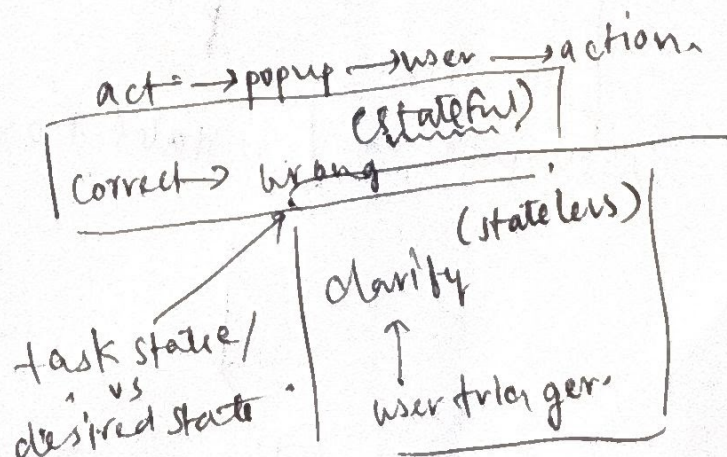

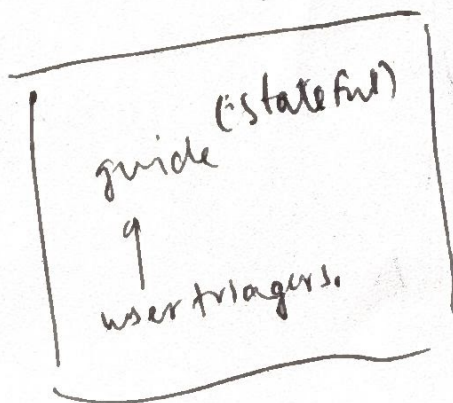

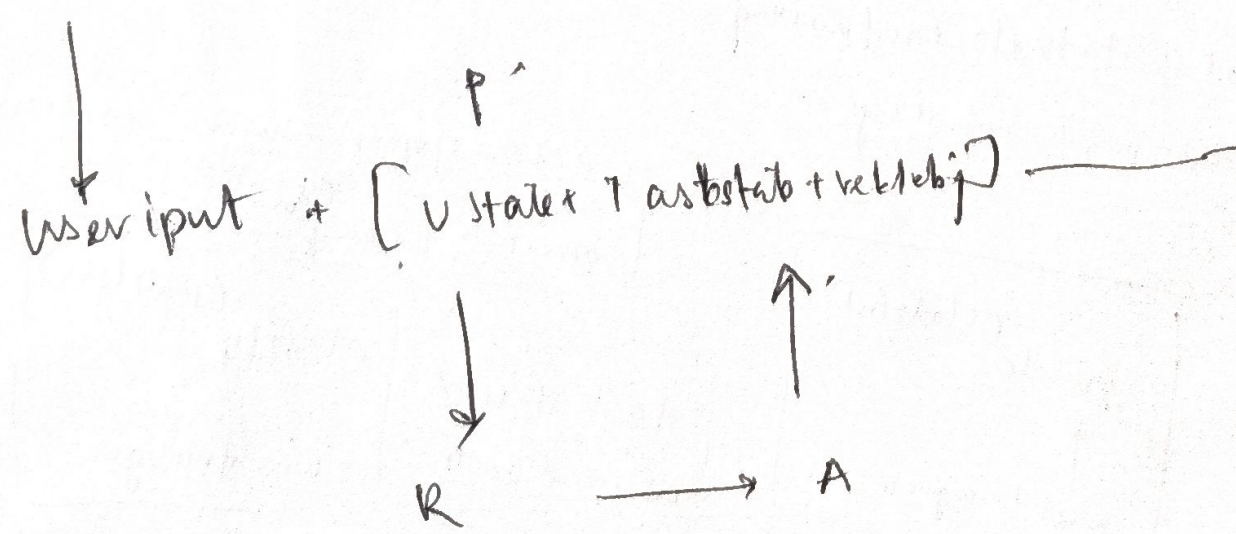

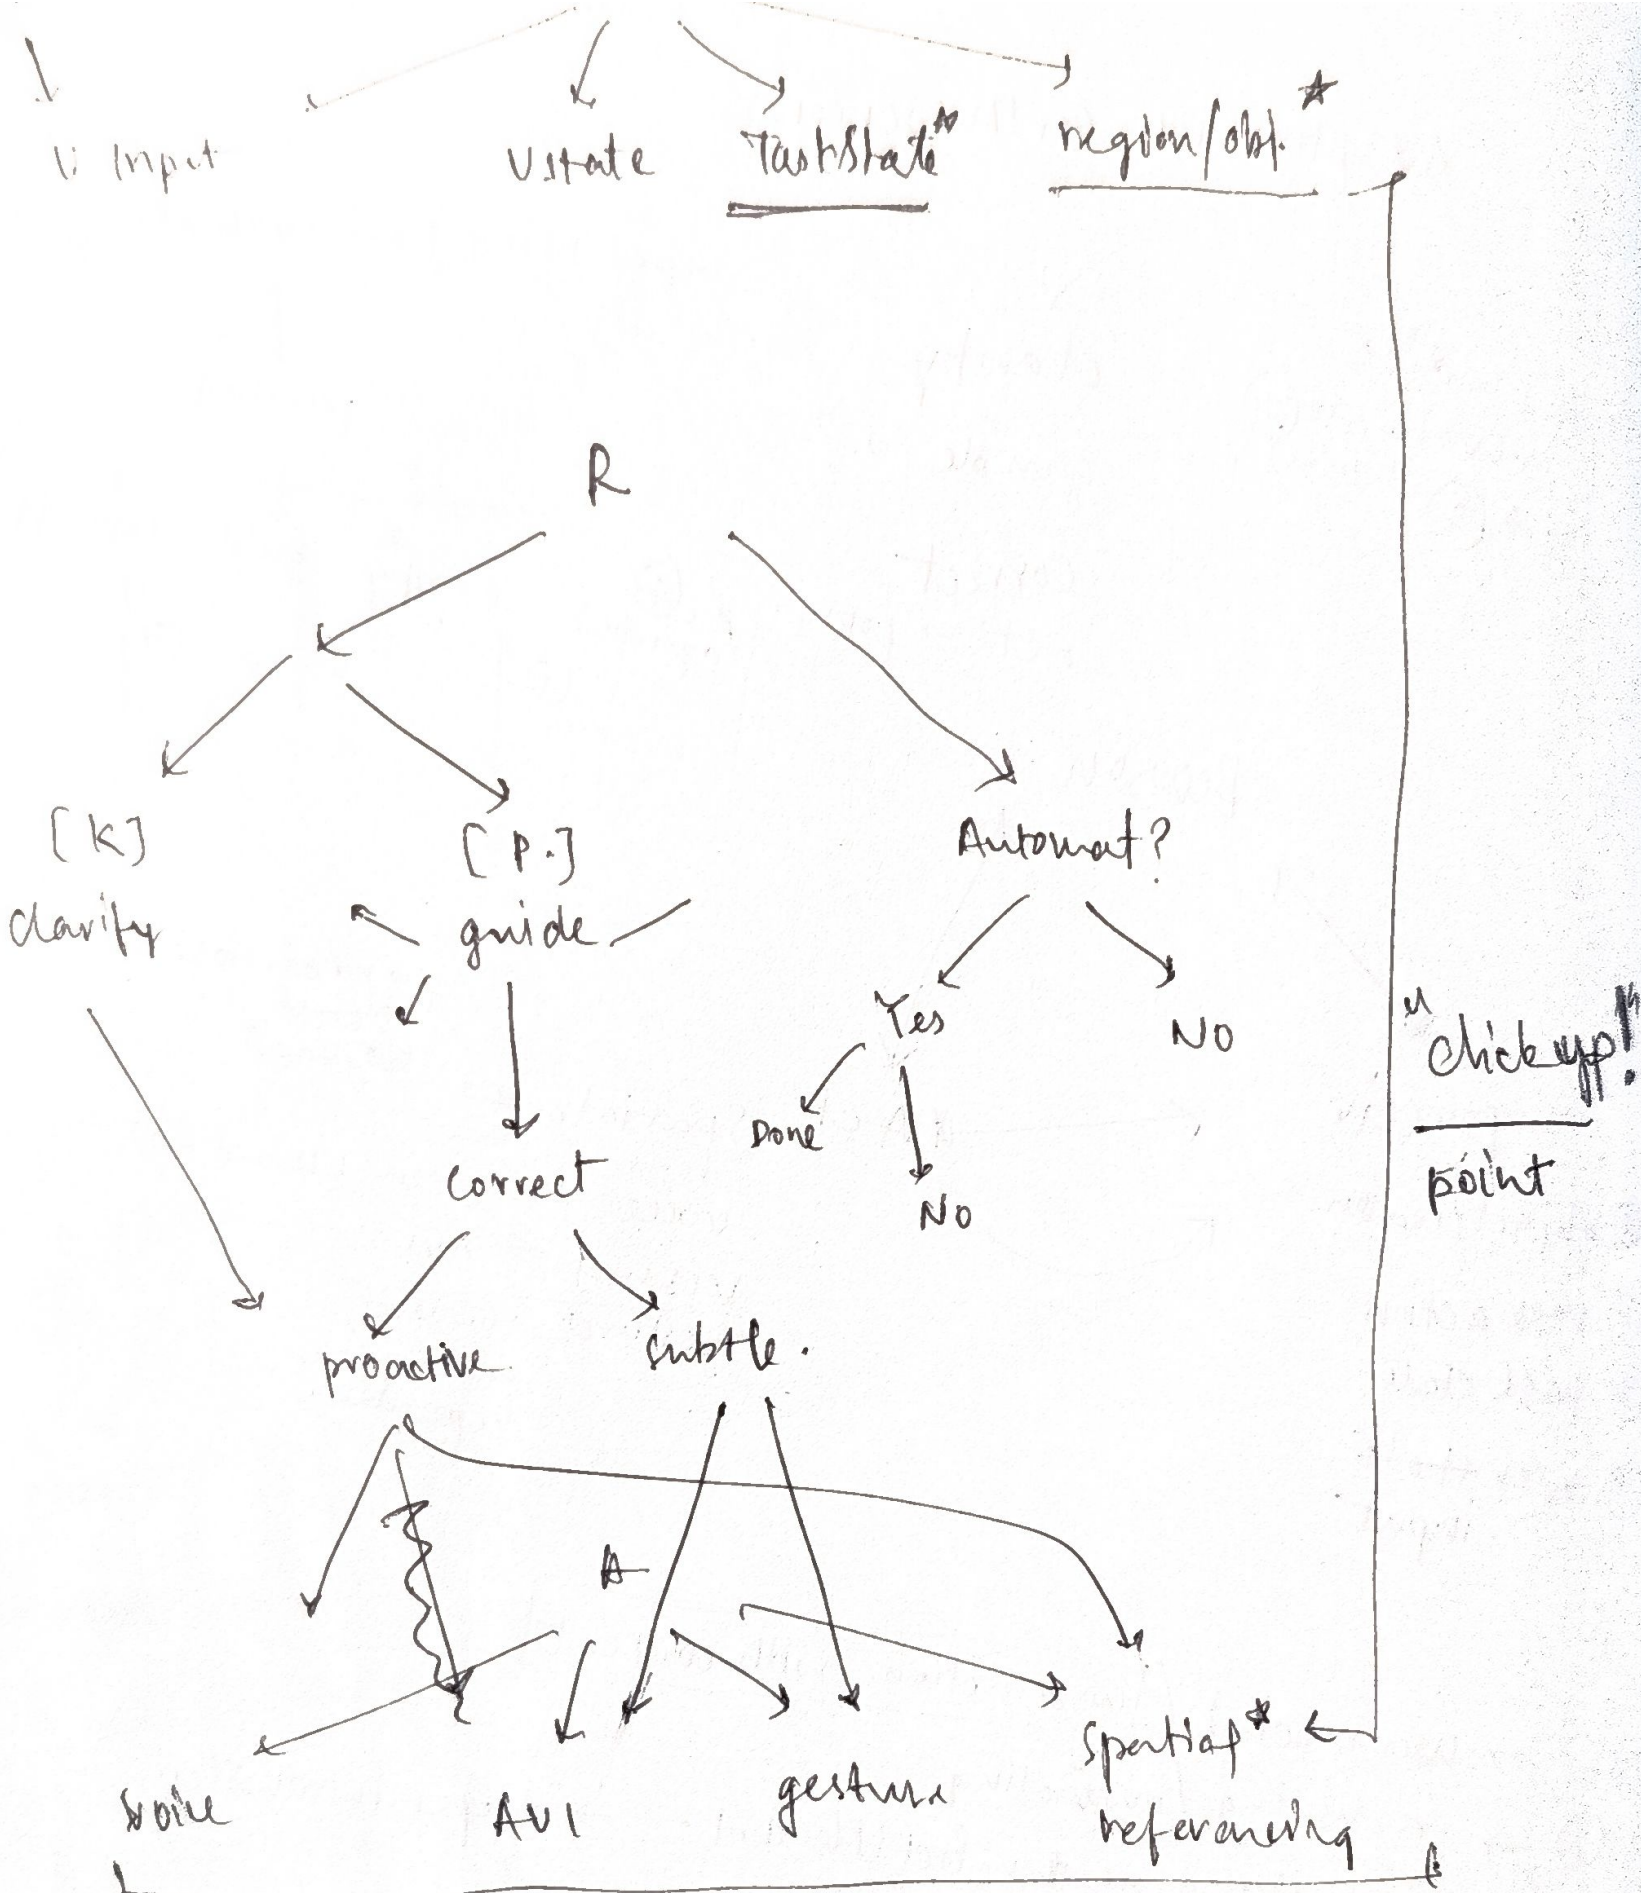

Adaptive UI. For the screen?

P

- ① + ② → user intent / user action with context
- ② + ③ → predicting ~~evaluating~~
- ③ + ④ → which step makes them feel like that → deeper into the step.
- ④ + ① → what is it that's confusing
- ① + ③ → predicting + evaluating
- ② + ④ →

see → think → point

I will be ok

Task state UI. (quid + correct) subtle.

clarity UI? → subtle.

gestures?

↳ What gestures.

correct; → gradient - up & down.
yes, →
no, →
yay, → yay!
thinking, → gradient
